

The California Air Resources Board, the San Joaquin Valley Air Pollution Control District, and the Central California Air Quality Studies Government–Private Sector Partnership invite you to attend the symposium on Central California Air Quality Research: How Science is Charting a Path to Cleaner Air. At the symposium you will be presented with the results from two state-of-the-science air quality studies conducted in Central California. You will hear a description of how air quality has improved, and how the science from these studies will continue to define clean air plans for particulate matter and ozone.

The California Regional Particulate Air Quality Study (CRPAQS) and the Central California Ozone Study (CCOS) embody a collaborative partnership co-funded by federal, state and local governments and private industry. These studies are designed to understand the urban and regional nature of particulate matter and ozone pollution throughout the San Joaquin Valley,

Sacramento Region and San Francisco Bay Area. Study efforts comprise extensive data collection of pollutant emissions, weather conditions and air quality; in-depth data analysis; and simulation of air quality using state-of-the-science computer models. The

results are providing the scientific basis to develop clean air plans for attaining national and state particulate matter and ozone air quality standards. While the focus has been on Central California, the research findings have nationwide applicability.

To learn more about CRPAQS and CCOS, visit ARB's web page:

Program Outline

MORNING

10:00 AM WELCOME

Seyed Sadredin, Executive Director,
San Joaquin Valley Air Pollution Control District

10:05 AM OPENING REMARKS

Kern County Supervisor Barbara Patrick
Member, Air Resources Board, Governing Board, San Joaquin
Valley Air Pollution Control District

10:15 AM Acknowledgement of Study Agency Partners

11:00 AM Policy Relevant Findings

Seyed Sadredin
Executive Director, SJVAPCD

Lynn Terry

Deputy Executive Officer, Air Resources Board

12:00 NOON LUNCH

"Evolving science in Central California"

Keynote Scientist, John Watson, Ph.D.
Desert Research Institute

Innovative Measurements

AFTERNOON

1:30 PM Particulate Matter Study Overview (CRPAQS)

Moderator - Ajith Kaduwela, Ph.D.
Air Resources Board

"Particulate matter – What does the study
tell us about the San Joaquin Valley
particulate matter problem?"

James Sweet, San Joaquin Valley Air Pollution Control District

"What are the sources of particulate matter?
What does the science tell us about
potential control strategies?"

Karen Magliano, Air Resources Board

BREAK

2:45 PM Ozone Study Overview (CCOS)

Moderator – John DaMassa, Air Resources Board

"Ozone – What is the chemistry of ozone
formation in the study region? What are
the exposure patterns?"

Phil Martien, Bay Area Air Quality Management District

"What are the sources of ozone? What does the
science tell us about potential control strategies?"

Ajith Kaduwela, Ph.D., Air Resources Board

4:00 PM CLOSING REMARKS / ADJOURN

For more information contact the Valley Air District

Sheri Bohigian, 559-230-5852 / sheri.bohigian@valleyair.org • Maricela Velasquez, 559-230-5849 / maricela.velasquez@valleyair.org

Registration Form – Registration Deadline Is May 12, 2006

Name & Title

Company/Organization

Address

State & Zip Code
